

SOLUTION SUMMARY

BUILD ENTERPRISE APPS 20X FASTER WITH 100X LESS CODE.

Oracle APEX is a low-code development platform that enables you to build stunning, scalable, secure apps with world-class features that can be deployed anywhere.

Using APEX, developers can quickly develop and deploy compelling apps that solve real problems and provide immediate value. You won't need to be an expert in a vast array of technologies to deliver sophisticated solutions. Focus on solving the problem and let APEX take care of the rest.

ORACLE APEX

The Oracle Web Application Development Platform You Already Own!

- If you purchased an Oracle database license, you already have everything you need to start building useful, scalable, secure applications using Oracle Application Express (APEX).
- With a knowledge of SQL and PL/SQL you already have the skills needed to quickly create a modern web application in little time.
- With thousands of worldwide customers and even more business apps built on top of it, APEX is the proven platform for your next application project.

(See reverse for solution details)

BUILD ENTERPRISE APPS FASTER WITH LESS CODE.

- APEX is used to quickly create fully operational business applications with less coding, in a shorter period of time.
- By pre-packaging the components every web application needs, APEX cuts the cost and time to develop new applications by weeks or months and replaces manual coding.
- Spend more time on the business requirements and in improving existing business processes, and less time on IT implementation details.
- Build the core of your application by dragging and dropping web components into place.
- Utilize existing Oracle knowledge because APEX uses PL/SQL as the main programming language.
- Stop reinventing the wheel, and take advantage of pre-built APEX applications, web components, and creative themes to accelerate your development. Or if you need to customize, APEX supports that as well.
- Easily migrate between environments using import and export of the entire application within a single export file.

WHAT CAN YOU DO WITH APEX?

- Create new web apps quickly and easily
- Replace legacy applications
- Oracle Forms Modernization
- SAAS and EBS Extensions
- Dashboard and Analytic reporting
- RESTful integration with other applications

OAPPSNET PARTNERS IS AN ORACLE NORTH AMERICAN APEX PARTNER

With over 25 years of Oracle Forms, E-Business Suite, and Oracle APEX experience, oAppsNET Partners can help guide your organization through your APEX development projects.

We have assembled a top notch team of APEX consultants, developers, and Oracle architects who have successfully completed dozens of successful APEX projects. We can help guide your APEX application development and advise your organization on ways to improve the ROI of your development projects.

Reach out to oAppsNET today to see how we can help.
